GLASS COLUMN

Mouth finish of tumbler and stemware

Cold Cut (CC)

Cut off the burn-off ring with a diamond cutter, polish it with a file with diamonds to make it smooth, and lick it with flame. Since there is no ring, the mouth part looks sharp and high quality. Applicable products in the catalog are indicated by "CC".

CHAMPAGNE GLASS COLLECTION

*This champagne glass has a processing that makes it easier for bubbles to rise on the bottom of the inner surface of the glass.
*How bubbles form depends on the conditions.
*Dry the glass well before using.

Required Glass Quantity
140 pieces for 7 stacking stages
55 pieces for 5 stacking stages

The pedestal of the champagne glass has 4 non-slip bumpers (transparent polymer) glued to it. When stacking glasses, by fitting these four projections into the four glass openings on the bottom, the safety against vibrations of the tower is enhanced.

Each hand-crafted glassware may slightly vary in shape, size, and color which gives each product a uniquely distinctive artistic flavor.

AWADACHI

"Frosted glass-like small irregularities" on the inner surface of the glass changed the flavor of beer deliciously. This is a glass that makes creamy foam lasts longer and enhances the taste of beer. A product lineup with the best shapes and colors for all beer scenes, regardless of whether they are Japanese or Western meals.

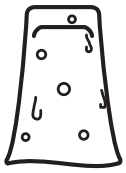
GLASS COLUMN

How "Foaming Glass" works

In order to drink beer more deliciously, it is important to make fine creamy foam. "Foaming Glass" is made by sandblasting and frosting the inner surface of the glass to create fine irregularities. These fine irregularities are the decisive factor for creamy foaming.

How to enjoy a delicious beer with "Foaming Glass"

1. Wash the glass thoroughly with detergent and dry it well without wiping it. Foams do not generate nicely when wet.



2. Pour cold beer slowly and gently along the inside of the glass.

3. The frosted glass-like irregularities on the inner surface create fine bubbles, and you can enjoy a creamy taste.

GLASS COLUMN

Japanese Sake

純米酒 (Junmaishu)

Rich, Slightly Dry
To enjoy the rich flavor, the short curving shape distributes the sake evenly in your mouth.

Appropriate Temperature for "Junmaishu"
Around 15℃. The tip to enjoy sake's mellowness and lingering flavor is to drink it at an appropriate temperature.

吟醸酒 (Ginjoshu)

Higher flavor, elegant and refreshing taste
The open top glass shape makes it easier for sake to come into contact with the air, further emphasizing the aroma and refreshing feeling.

Appropriate Temperature for "Ginjoshu"
10℃-12℃. Be careful not to let the temperature get too high. The scent will disappear. Also be careful not to lower the temperature too cold.

生酒 (Namazake)

Fresh scent, smooth in the throat
The slim, open-top glass shape allows sake to flow straight into your mouth, making it easier to pass down your throat.

Appropriate Temperature for "Namazake"
6℃-10℃. The tip is to drink it cold.

古酒 (Koshu)

Calming scent, mellow taste
In order to enjoy the deep scent and taste, the vertical seed-like glass shape is ideal to retain the scent.

Appropriate Temperature for "Koshu"
15℃-20℃. This temperature range maintains the balance between sweetness and sourness.

SAKE GLASS

SARARI
Top opening shape in the MASU style.
You can enjoy the refreshing flavor of sake and drink it smoothly.

FUWARI
Tulip shape with a swollen body.
You can drink sake with feeling a rich aroma.

KIRIRI
Vertically elongated shape.
Sake flows straight down your throat, giving you a refreshing taste.

YACHIYO KIRIKO

八千代切子®

"Yachiyo Kiriko" ("Yachiyo" Cut Glass) is the flagship glassware line of Toyo-Sasaki Glass. It is named after the town of "Yachiyo", where TSG's craft studio is located. The word "Yachiyo", literally means "eight thousand generations", symbolizes eternity and is considered to be a poetic and divine praise. Ancient Japanese motifs are actively fused with modern elements in each "Yachiyo Kiriko" design, which makes "Yachiyo Kiriko" unique to traditional Japanese cut glass schools and earns high artistic praise.
(Packed in a wooden box/Product information is inserted.)

Package

Ume (Plum)
It is considered a symbol of perseverance and vitality because it blooms early in the harsh cold weather.

Hyotan (Gourd)
It has many seeds, grows vines, and bears many fruits, which means that business will prosper.

Namichidori (Wave Plover)
Comparing the waves to life, it means "overcoming rough waves", and it conveys the desire for marital harmony and the safety of one's family.
