The
Gabriel-
Glas®

Glass Opening

The chosen glass opening (exactly 66 millimetres) concentrates the bouquet and aromas perfectly.

Special Haptics and Shape

When savouring the wine, there is room for the whole nose in the glass and the wine flows broadly over the tongue.

The special feel of the Gabriel-Glas® Gold Edition glass makes a clearly perceptible difference.

The V-triangle, at the very bottom of the glass goblet, favours maximum colour density.

The glass handle (a barely perceptible X-shape) allows elegant holding with all five fingers.

High Break Resistance

Does not have predetermined breaking points and guarantees high breakage resistance.

Bouquet Drive

The upper part, discreetly conical inwards, is an extension of the nasal canals and enables the bouquet to be optimally bundled.

The „bouquet drive“ on the glass belly accelerates the development of the aromas.

A small amount is enough to cover the entire width of the glass inside.

Instant Decanting Effect

The largest width of 95 millimetres enables a certain instant decanting effect by giving the just poured wine plenty of air.

Stability and Elegance

through the flat design of the glass base.

The machine-blown
Gabriel-Glas® StandArt
weighs just 150 grams.

In the dishwasher, please!

Both versions use high-quality, harmless
crystal glass, which is harder, more
scratch-resistant and more
resistant to breakage than lead crystal.

Please refrain from using tablets
and liquid detergents. Both are aggressive
and attack the surface of all glassware.

The mouth-blown
Gabriel-Glas® Gold Edition
weighs a featherlight
90 grams.
