**Strength and Beauty.**  
**These are at the heart of ADERIA's hospitality.**

"Strength" and "Beauty"

These two elements support the chefs and impress the guests.

Dishes that are easy to wash, easy to carry, and that are resistant to clouding, breakage and chipping.

Dishes that make foods look attractive, and decorate the setting and encourage creativity.

ADERIA focuses on beauty and functionality to bring life to the "spirit of hospitality".

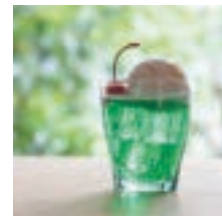

ION-PRO-TECT is a chemical technology that reinforces glass by exchanging ions within the glass and creating a compressive stress layer. ION-PRO-TECT enables the treating of thin glass with complicated configuration, which conventional physical reinforcement technologies are not capable of processing.

庄内  
craft

The Shonai Plain is blessed with the abundant water of the Mogami River and the fresh air of Mount Chokai. Please enjoy the clarity of "Shonai Craft", the handmade glass products that depict the clear air and flowing water in the Shonai area.

ADERIA  
COURBE  
PALETTE

Colorful glass adds color to the table like paint. The thickness of handmade glass enhances the color of the glass and gives a sense of stability for regular use.

ION-PRO-TECT

ADERIA COURBE PALETTE

## Tebineri — P66-67

The warmth of hand made pottery's texture has been transferred to a glass tumbler.

The name of "Tebineri" came from a technique of pottery making, which means "making up the shape by hand and fingers without using potter's wheel."  
We transferred the shape made by "tebineri" technique done by craftman with passion to the glass. It became a tumbler with gentle appearance.  
These tumblers can match to traditional Japanese style pottery or earthenware. It's also good for casual usage because they are strong by the thick walls.

## Tebineri fluid — P70

Depicted the texture like wave of water with a glass

We achieved to transfer the gentle shape like hand made blow glass by our original technology.  
It's assynmetric and easy to hold with your hand because some parts are widely dented.  
As they can suit to various materials or styles, you can enjoy co-ordination.

## Tsuyoiko Glass — P69

Even small hands will find this glass easy to hold with the dimple in the middle. The perfect size for children, the small size holds about 100ml, and the medium size holds about 150ml when filled about eight-tenths full. Safety is covered with the easy-to-hold design and advanced reinforcement technology (ION-PRO-TECT).

## Tsuyoiko Glass — P111

Kakurenbo

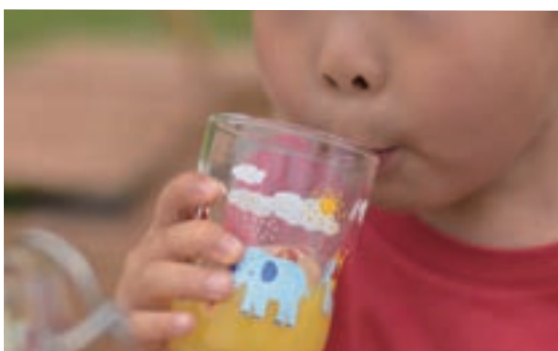

The glass's transparency is used to create a design that looks different on the inside and outside. The animals, only slightly visible when the glass is full, are revealed when the glass is emptied. We hope children will be excited during mealtime, just as when they are reading a picture book. This product was designed, incorporating the opinions and ideas of parents who are currently raising children.

## Tsuyoiko Glass — P111

nico

We hope that little hands and lips will come in contact with real glass during their daily lives and help them develop rich minds. We have incorporated these hopes in the small "Tsuyoiko Glass nico" (Strong Children's Glass nico) with a smiley face. The reinforced opening increases resistance to cracks and chips on the glass lip compared to regular glass and enhances safety.

# アテリアレトロ (ADERIA RETRO)

Nostalgic yet new retro glassware featuring Showa-era cuteness.

“ADERIA RETRO” is a remake of the ADERIA glassware that was once used in households in the Showa era so that it can be used safely today. ADERIA’s tableware was popular for its cute design and affordable price and adorned many tables in the Showa era. One of the most popular products was printed glasses with cute patterns such as flowers and animals. These products’ nostalgia and warmth attract some

customers. They have continued to use them even after production was discontinued. ADERIA RETRO was born from the encouragement of these fans. The new products maintain the traditional charm and are easy to use in today’s lifestyles.

## アテリアレトロ — P80-84 (ADERIA RETRO)

Ishizuka Glass, a manufacturer of a wide range of glass products from tableware to beverage bottles, was founded in 1819 and has produced various products. “ADERIA” was born in 1961, when we made our full-scale entry into the tableware business and has been enjoyed by people for more than 50 years. Many retro-pattern glasses and glass jars to make plum wine are made by ADERIA.

## 2 Characteristic Mark

**IPT**

ION-PRO-TECT is a chemical technology that reinforces glass by exchanging ions within the glass and creating a compressive stress layer. Since ION-PRO-TECT enables the treating of thin glass with complicated configuration, which conventional physical reinforcement technologies are not capable of processing, it is suited for the production of elegant items such as wine glasses.

**UIH**

Ultra Ion Hard (UIH) is the toughened glass which is aimed the highest durability. We could achieved this technology by mixing whole ionizing method and our original know-how.

**Full Ion Tempered**

Full tempered glass by ion-exchange method. This is upgraded version of regular full tempered glass. By this process, it can avoid to have scratch marks around the glass body.

**Rim Tempered**

Ordinary physical tempered glass. By tempering rim part, it can avoid to have chipping around rim.

**Rim Ion Tempered**

Chemical tempered glass. By ionizing method can make the effect of tempering to thin wall glass. Especially, it can avoid chipping around rim.

### Is full physical tempered glass dangerous?

Ordinary full tempered glasses are known as dangerous glass which make small pieces spread when it breaks. However, all of tempered glasses of ADERIA are safe products by our original improved technology. You can use them without concerning safety.

**Stackable**

You can stack glasses with same items.

**Dishwasher Safe**

You can wash these glasses by dishwasher.

**Heat Resistant Glass**

Borosilicate glass which is strong for high heat. It can tolerate more than 120 degree C° of difference.

**Glass Ceramic**

Glass ceramic which is strong for high heat. It can tolerate more than 400C° of difference.

**Clear Ti Coat**

By hard titanium coating, the surface of the glass body became strong and it makes the glass scratchless and more durable.

**crystal**

Category		Ratio of Metal Oxide	Retractive Index (nD)	Density (g/cm <sup>3</sup> )
Crystal glass	Includes lead oxide	Full lead crystal	Lead oxide is 30% or more	1.520 or more
		Lead crystal	Lead oxide is 24% or more	1.520 or more
	Semi-lead crystal	Lead oxide is 10 to 24%	1.520 or more	-
Not include lead oxide	Potash crystal Barium crystal Titanium crystal	One of (or sum of) potassium oxide, barium oxide, titanium oxide and zinc oxide are 10% or more.	1.520 or more	-

\*This data is based on "Definition of crystal glass" regulated by Japan Glass Products Association (Sep. 2009)

## 3 Dimensions & capacity

**Dimensions**

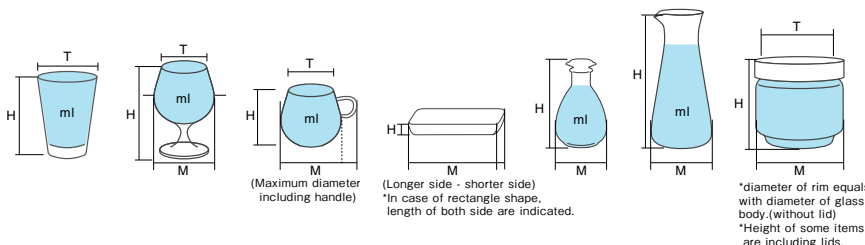

※ "M" indicates maximum diameter of the product.

**Capacity**

Indicated capacity is based on full fluid capacity of the product. In case of seasoning containers and decanters, practical capacity to use are indicated.

※ Indicated capacity are not exact. (It may be a little different from actual item.)

※ In case of hand made products, shape, color and pattern also can be a little different.

## 4 Hand made products

The following are three particularly noteworthy strength test results of products treated with ION-PRO-TECT

**Impact test**

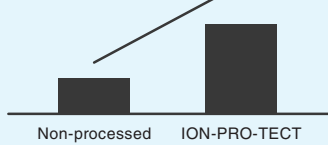

Impact is applied to the bowl of stemware to measure resistance to physical shock.

Twice as strong as non-processed

**Four-point bending test**

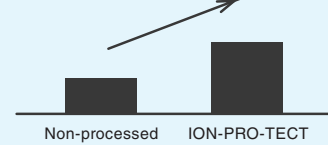

A stemware test in which pressure is applied to measure its bending strength.

2.5 times stronger than non-processed

**Chipping test**

Plate rims are subjected to shock to measure their resistance to chipping.

Twice as strong as non-processed

※ Test data produced by Ishizuka Glass

**Beer Mug**

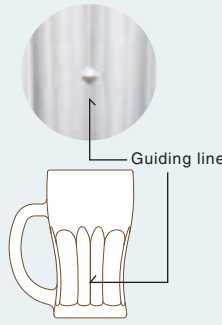

Box of one piece, good for a personal gift!

**Corbe Beer Mug 380 P-6686**

M121-84 T83 H143 ml380  
BOX SIZE: W117×D87×H149  
1×24=24pcs

It includes a 3D leaflet that catches people's attention in shops/stores

A simple highball recipe that uses the curved guiding line is listed on a leaflet

**A perfect mug in a box for a personal gift!**

- High-class cut-style design
- Rather fat shape. Comfortably stable
- A big handle that both men and women find easy to grasp
- Includes a carved guiding line, which allows one to conveniently make cocktails such as highballs

Modern glassware that is created with the abundant nature of Aomori as its theme, capturing its freshness

Accentuate the chef's creativity with this handmade glassware series. The traditional technique of chu-buki (free-form glassblowing) transforms the soft texture of glass into a transparent glass plate. The hard, cold texture of the glass and the thickness of the glass create a depth in the simple plate. Tsugaru Vidro's unique colors are combined with vivid colored glass and expressed in the small dishes. A playful touch is added with Aomori-type fruits.

These plates were created based on the image of rocks and ice over the surface of water. To emphasize the hardness of glass, carving and/or coloring are arranged on the bottom of the thick glass plate. The clearness and depth of the glass add glomour to the plates.

庄内  
craft

Red glassware is rather hard to find. This series is transparent, and gives a different look depends on the condition of light.

The difference in the thickness of the glass creates the impressive gradation of the color.

**Tada!**

**These are "no-spill" containers!**

Once a spout is twisted, even if the container falls, it does not spill. It also prevents the evaporation of the content, which makes it perfect for seasonings such as soy sauce and vinegar.

This extended part of the design is the key!

## Soy sauce container with less dripping

- This simple product design is suitable for daily use.
- It is easy to keep glass products clean because stains and smells are unlikely to attach and remain on the surface.
- Since content is visible from the outside, it is easy to check the volume.
- You can choose the one that means your purpose from a wide variety of products.
- It employs a design that allows a user to clean easily by removing packing material inside of the cap.

● Cap: Stainless steel and ABS resin    ● Gasket: Thermoplastic elastomer (TPE)

## Environmentally-friendly, sanitary and economic!!

· Since the body is made of glass, it is an environment-conscious and safe product, which allows users to use comfortably.

# セラベイク Cera Bake

Perfect bakeware for cook and clean up

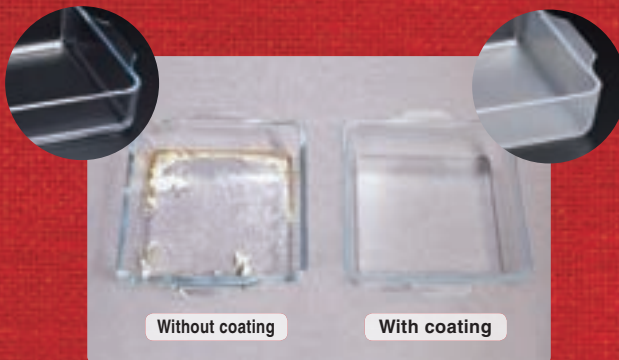

It's stress-free, heat resistant glass bakeware.

POINT  
01

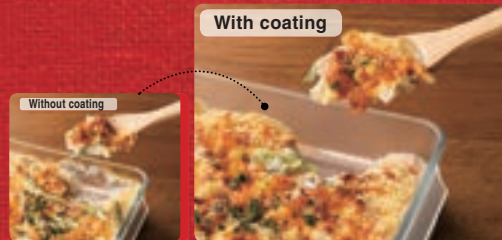

## Easy and Quick washing!

The ceramic coating prevents food from sticking to Cera Bake. Since materials do not stick to the container, it is easy to wash and clean. You will enjoy cooking more than before because it is easy to clean up.

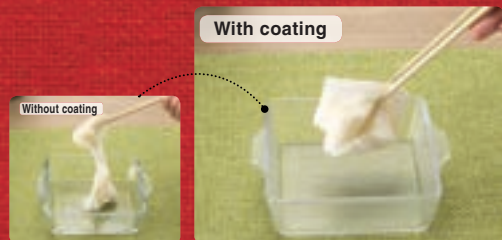

Without coating

With coating

With coating

Without coating

With coating

Without coating

POINT  
02

## Cooking sheets and butter are no longer required!

You can omit the process to use a cooking sheet or butter/grease to prevent food sticking to the container. Enjoy economic and healthy cooking without grease. In addition, cooking time is reduced.

POINT  
03

## Cera bake is a great-looking container that can be served as it is!

Since it has a simple design, it is easy to match it with other tableware. So, it makes dining table co-ordination simple. There are fewer items that you need to wash after the meal.

POINT  
04

## It is a long-lasting product that you can use for a long time!

Cera Bake has passed the peeling test using a metal turner over 10,000 times. It is a durable and reliable product that you can use for a long time.

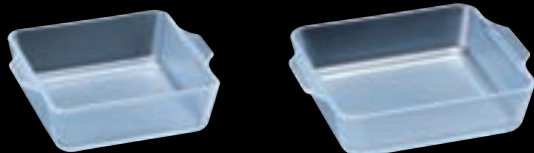

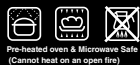

This series was renewed and the item codes were changed in December 2022.

**Cookware**

**An easy-smoking cooker is now available in the kitchen**

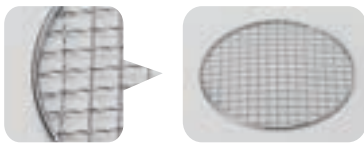

Since ancient times, smoking has been used to preserve food items. Nowadays, in spite of the advancement of refrigeration technology, smoking remains a popular cooking method due to the fragrance and flavor that is unique to the method. Now you can enjoy smoking in your way with this easy-to-use cooker.

Cannot heat on an IH cooking heater

**With a smoking mesh**

By placing ingredients on a smoking mesh and adding a dome-shaped glass cover, you can smoke food items evenly with the smoke that circulates under the cover.

**With trial smoking chips**

The set includes cherry smoking chips (50g) for trial.  
※ We do not sell smoking chips alone.

### MC Container

Let us proudly introduce our new storage container series that combines stainless steel parts and a glass jar, "Metal Cap Containers". It was developed with the concept, "a jar that matches the modern interior". The glass storage containers look smart and fit well when they are placed in a modern kitchen and living room. The usage is limitless depending on ideas and preference. You can make fruit wine and pickles, and store dried food and rice. This series provides you with a great way to show off the content in a beautiful way. It is also popular among professionals. For example, the container can be placed on a counter of a cool bar.

## Enjoy making seasonal fruit liqueur

We can feel four seasons by fresh fruits. You can enjoy eating fruits and it can make you get much nutrition, but we offer you to try making fruit liqueur. You can enjoy those fruits for longer time. We have various size of storage bottle for fruit liqueur, you can enjoy fruits more with Aderia storage jars.

## Basic Knowledge for making fruit liqueur

1. Alcohol ratio of liqueur ideally should 35 degree or more.
2. Sanitize the bottle by alcohol or dishtowel which absorbs liqueur.
3. Preserve about two months in a glass storage jar. Remove fruits from the jar after that. (If sugar is few, better to preserve for longer time)

## How to make plum liqueur (Umeshu)

### Ingredients

- 1 Kg of plum
- 500 to 800g of rock sugar or 2 cups of honey
- 1.8L of white liqueur (Alcohol 35 degree)

- (1) Prepare fresh and adequate sizes of plum and wash them well.
  - (2) Remove stem of plum by toothpick, wipe out moist by paper towel.
  - (3) Place a layer of plums in the jar, then a layer of rock sugar. Repeat placing these two layers alternately. Repeat placing these two layers alternately.
  - (4) Pour white liqueur gently into the jar.
  - (5) Cover by the lid and store the jar in a cool, dark place. Shake the jar occasionally to help the sugar mix with the alcohol.
  - (6) The liqueur is ready to drink when you are satisfied with the taste. Enjoy Umeshu with your favorite style!
- When can you drink? Ready from 2 to 3 months later. A year makes ripe to delicious!

## Calendar of seasonal fruits

- Period to make liqueur
- Period to drink liqueur

## For your convenience!!

### Easy carrying

The broader handle allows you to carry comfortably.

### Easy attaching & removing

Removable handle is for easy wash and hygienic use.

### Easy pouring

Inner cap has spout attached to pour easily from the jar.

### Easy washing

The wide mouth allows you to wash inner surface easily.

## Storage Jar

This glass pot is handy for serving beverages at the dining table. It is recommended for storing homemade health drinks, etc. The practical size fits right in your refrigerator's door pocket.

**History of Aderia Glass jar**

- 1962 Liquor Tax Act revised Homebrewed fruit liquors become legal. In the same year, fruit liquor jars are produced by an automatic bottle-making machine. #3(2-liter), #5(4-liter) sizes launched in October.
- 1963 #7(5-liter) size launched in October.
- 1971 Jar with resin handle launched. Tabletop fruit liquor jar (1.8-liter size) launched. (1/3 size of #5)
- Printed bottles launched.
- 1973 Ladle and funnel set added.(not included now)
- 1976 Large #10(8-liter) jar developed and launched.
- 1982 Spout is included in cap for first time.
- 1996 1.5-liter, 2.2-liter handle fruit liquor jar launched. Technology of shaping handle with jar improved usability.
- 2003 2-liter tall bottle launched. Convenience further improved by a jar designed to fit in the refrigerator pocket.
- 2012 "Reissued Glass Jar" launched, commemorating 50th anniversary of the Aderia fruit liquor jar.

#### Versatile storage containers

It is easy to open  
and pour

Since it has an  
inside cover that  
has a filtering  
function. It is easy  
to pour the content  
without dripping.

You can use a straw  
through the inside  
cover.

※ Only big items can  
be filtered with the  
inside cover.

### The warmth of hand made pottery's texture has been transferred to a glass tumbler.

The name of "Tebineri" came from a technique of pottery making, which means "making up the shape by hand and fingers without using potter's wheel."

We transferred the shape made by "tebineri" technique done by craftsman with passion to the glass. It became a tumbler with gentle appearance.

These tumblers can match to traditional Japanese style pottery or earthenware. It's also good for casual usage because they are strong by the thick walls.

### Depicted the texture like wave of water with a glass

We achieved to transfer the gentle shape like hand made blow glass by our original technology. It's assymmetric and easy to hold with your hand because some parts are widely dented. As they can suit to various materials or styles, you can enjoy co-ordination.

## Yurari Yurari

This unique glass will make you want to touch and turn it. Whether you're enjoying a lively dinner or some quiet alone time, just spin the glass with your finger. The gentle sway will soothe your soul. Enjoy a playful and fun time with the wobbling glass.

Yurari Yurari - Sake Glass  
P-6729

M66 T66 H55 ml90  
6×12=72pcs

Straight shape makes the taste of sake refreshing.  
(practical capacity: approx. 70ml)

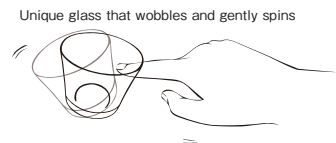

Yurari Yurari - OF Glass  
P-6730

M88 T88 H85 ml280  
3×16=48pcs

Ice ball fits perfectly.  
(practical capacity: approx. 240ml)

Unique glass that wobbles and gently spins

The center base of the glass is convex.

The "practical capacity" is the approximate volume of liquid that will not spill when tipped.

## Children's sensitivity fostered with glassware

There's no need to keep children away from using glassware because it could be broken. Instead, it is important to allow children to handle authentic natural products from a young age so they learn to use it carefully. The children's glassware series "Tsuyoi Ko Glass" (Strong Children's Glass) was designed under the supervision of a nursery school teacher, who is also food education instructor. We have considered safe use by incorporating an easy-to-hold shape and reinforcing treatment (ION-POR-TECT treatment).

### Safety use for the children

This series have toughened by reinforcing treatment. It is durable for cracks and chips compare with glassware with no treatment.

### Easy to hold and right size for the children.

S size contains 100ml and M size contains 150ml when you pour the juice by eight-tenths.

### Easy to hold by the shape of the bowl.

This bowl has step to hold. It is good for salad or dessert.

### Safety and reliability of made in Japan

This series produce by Ishizuka Glass having 200 years history.

### Using social contribution materials for the package

The package of this series using "colorful wish" reuse the a thousand origami cranes arrived to the Hiroshima Peace Memorial Park.

ION-PRO-TECT is a chemical technology that reinforces glass by exchanging ions within the glass and creating a compressive stress layer.

"Meals" do not just satisfy hunger.

Meals enrich our minds through color and taste, etc.

One important element of meals is the selection of tableware. Tableware brings out the unique flavors of food. For example, rice tastes best when served in a ceramic rice bowl, and lacquered soup bowls are perfect for miso soup.

Even juice tastes better when served in a glass cup.

Is that something we learn as adults? No, children learn and sense more things from tableware than adults do.

I hope you will select authentic tableware for little hands and mouths to use during daily life and to enrich their minds.

**Ikuyo Nakanishi**

Food education instructor, Nursery teacher

**Heat Resistant Glass**

How to use a

### Mug & Glass

1

Set a filter, and add a teaspoon of tea leaves (about 2.5g)

2

Pour hot water into the glass, put the lid over the filter, and let the tea leaves steep and wait until they open for three minutes or until the time that you prefer.

3

After steeping, remove the lid. Place the lid upside down.

4

Remove the filter and place it on the lid. Now, you can enjoy tea at your preferred strength.

This is a set of a mug/glass and filter, which is great for making tea for one person. The double wall glass prevents the surface of the glass from becoming too hot to hold. In addition, it maintains the temperature of the drink, and a hot drink will stay hot for a long time.

How to use a

### Teapot

1

Set a filter, and add an adequate amount of tea leaves.

2

Pour boiling water into the pot, place the lid, and the tea leaves steep and wait until they open for three minutes or until the time that you prefer.

3

Set a filter, and add an adequate amount of tea leaves.

4

Enjoy tea at your preferred strength.

This is a teapot in which you can adjust the strength of tea without removing tea leaves from the pot. Once you rotate the lid, a wall inside the filter blocks tea leaves. Therefore, the strength of the tea remains until the last drop. This is a teapot in which you can adjust the strength of tea without removing tea leaves from the pot. Once you rotate the lid, a wall inside the filter blocks tea leaves. Therefore, the strength of the tea remains until the last drop.

## Good points of Aderia retro

**POINT 1** Reliable quality

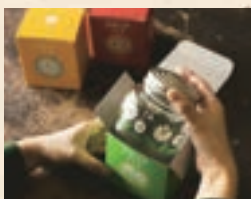

This series looks retro, but the products manufactured in Ishizuka Glass's own factory of today. With thorough strict quality control, you can use this series safely.

**POINT 2** The shape matches in modern lifestyle.

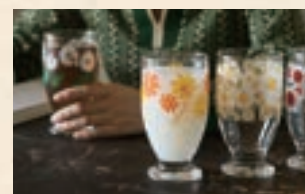

It's not just revival, the design is modified by focusing on usability in modern life. New design is easier to use and well matches in modern life.

**POINT 3** Elaborated package, seal and leaflet

Based on the design of Showa era, reproduced the atmosphere at that time in the details. Products are in firm package box. You can use them at your home as well as gift.

**アテリアレトロ** Instagram

Tsuyoiko Glass  
*nico*

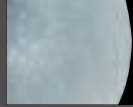

**The Premium NIPPON Taste**

We captured some spectacular Japanese traditional cultural design and transferred to our glassware using our modern technology. These can be used as not only display but also main character on the table.

**The Premium Nippon Taste  
みぞれ九谷 Mizore Kutani**

We have combined glass specially treated with a mizore sleet type design with Kutani-yaki, a traditional craft from Ishikawa prefecture. Enjoy this new type of tableware that unites modern processing technology with traditional Kutani-yaki techniques.

**"Mizore(Sleety)" finish**  
The finish of glass surface looks like frosting processed but this is made by our special technology. It looks much cooler than ordinary frosting. We call this finish as "Mizore(sleety)" finish.

The pattern on the stem and stand is painted by craftsman of Kutani-yaki with method of calligraphy and it makes modern atmosphere.

**Mizore Kutani - Craft Sake (Mellow)  
9565**

# The Premium NIPPON Taste

## The Premium Nippon Taste

### 竹虎 Taketora (Bamboo & Tiger)

The combination of bamboo and tigers was introduced from China around the Nara period (710-794) as a good omen. With its courage and deep maternal feelings, the tiger is believed to ward off evil and bring safety to the family. With its fast growth and supple, unbreakable vitality, bamboo is associated with longevity and family prosperity. The "Take-Tora" series, which combines these two good omens, is a wonderful gift for someone special.

※Set of sake glass and Masu - wooden box coaster.

### 和小紋 Wakomon

This elegant series features exquisite Komongara patterns traditionally used on cotton products such as kimonos and tenugui towels since the Edo period. Transferred onto glass with a single gold color, these Komongara patterns each have an auspicious meaning that represents eternal peace when expressed as a repetitive pattern.

### 六瓢箪 Mubyotan

"MUBYOTAN" means "six gourd". Gourd is a symbol of perpetuation of descendants because of the it's feature of growing in clusters. At the same time, as MUBYOTAN has common sound with MUBYO (Never be ill), we make the pattern of six gourd mean "protection from illness".

**MUBYOTAN Sake Glass 6052**

## The Premium Nippon taste

### 風神雷神 Fujin-Raijin

The original illustration of this design painted in early Edo period by Sotatsu Tawaraya is the national treasure of Japan. After 70 years "Korin Ogata" re-made the same illustration and this has been inherited by some modern artists.

#### Elaborated sound

Artisans hand blown the body and the clapper of wind bell piece by piece, the clapper made by semi-lead crystal and decollated tiny bump & dent. Wind bell makes refreshingly cool sound yet complicated.

## EL DORADO

Since ancient times, mainly in Europe, there were legends about a city filled with gold. Around 16th century, explorers believed that "El Dorado" a golden empire, existed in the innermost depths of South America. "Zipang", a country of gold, was described in "The Travel of Marco Polo".

As an homage to the legends related to the world of the gold, we created the "El Dorado" series by expanding the image of the legends and combining it with the pieces.

With our special technology, we corrode the surface of the glass to create a crystal-like face, and apply a gold transferring process. The products are classic, dazzling and splendid.

We hope this series, inspired by the romantic fantasy about the golden land, will make your daily life more colorful and fascinating.

## The Premium Nippon Taste Edoneko Glass

People have always been fascinated by cats. Utagawa Kuniyoshi, one of the most famous ukiyo-e artists of the late Edo period, was known as an unrivaled cat lover. The cats depicted by Kuniyoshi are cute, beautiful, and humorous. Edo Neko Glass glassware features ukiyo-e painted by Utagawa Kuniyoshi, arranged and reproduced with modern technology and techniques.

A glass furin wind chime has recently been added to the Edo Neko Glass Series. The glittering and adorable cats and the refreshing sound of the furin wind chime will complement a relaxing moment.

Zetsu

The furin wind chime is adorned with dancing cats in summery attire, wearing tenugui tea towels on their heads. The golden fireworks pattern glitters and shines when the furin wind chime sways in the wind.

**Edoneko Windbell**

**Neko no Ateji Namazu glass**

Namazu (catfish) is one of the Neko no Ateji series, in which cats form letters to spell out fish names.

The unique ukiyo-e design has been transferred onto the glasses. One cat is illustrated on each glass, and the word Namazu (catfish) appears when three glasses are placed side by side for a toast. The “ず” character is a variant of the character “づ.”

## Zodiac Sake Glass

Since ancient times, the Japanese Zodiac animals have been popular as auspicious symbols. People used the animal sign of the current year to wish for prosperity in business and safety in the home, while the animal of the year of one's birth was used as an amulet to ensure good health and to ward off evil. Folk toys created from these customs have been reproduced on our "Medeta Eto" glassware. We hope you'll find a lucky item for yourself or as a gift for your loved ones.

**medeta mono (Lucky item) 独楽 KOMA |**

The "medeta mono" series of glass tableware captures the fascinating colors and patterns of traditional spinning tops found in various parts of Japan. "Spinning tops are said to bring good fortune when kept nearby." We hope you will gift the "medeta mono" tableware to wish your loved one's happiness or as a lucky charm for yourself.

**Hakata Goma**

The pattern of heaven, earth, and people, with gold representing "heaven," red representing "earth," and green representing "people," is said to be good for warding off evil.

**Edo Goma**

Red represents "health," black represents "strength," yellow represents "wealth," green represents "good harvest," and purple represents "nobility." The combination of these five colors is said to bestow longevity and ward off bad luck.

**Oyama Koma**

The red, indigo, and purple pattern comes from Buddhist altar fittings and is meant to bring family safety and business prosperity.

**Crane:** Longevity and marital bliss  
The crane symbolizes longevity and marital bliss, as once a couple becomes husband and wife, they will happily remain together for the rest of their lives.

**Turtle:** Longevity and increased fortune  
With their long life span, turtles are considered a symbol of longevity. The small turtle is also called the "coin turtle" because its shell resembles a small oval coin and is said to bring good luck in money.

**Sea bream:** Prosperity in business, longevity  
Since Ebisu-san, one of the Seven Gods of Good Fortune, holds a sea bream in his arms, it symbolizes business prosperity. Also, since it is one of the longest-lived fish, it is regarded as a delicacy for long life.

## Bringers of good fortune, "My Family"

Every moment spent with your pets become irreplaceable memories. Their daily presence melds them further into our lives, transforming them from mere pets into "treasured family members". Among others, small birds are considered symbols of luck that invite happiness and good fortune. While of course keeping real birds can envelop you in a gentle feeling that warms the heart, bird goods can also invoke the same emotions. The "My Family" combines the simplicity of handcrafted sculpturing with the sense of translucency that only glass can provide to create charming and attractive ornaments. When bathed in a gentle light, these small birds may bring happiness and good fortune to the family. Japanese experts in glass-making have poured their hearts into making each and every member of "My Family". We hope that you will cherish them forever.

## TEBINERI HARUIRO

Our factory is located in Iwakura, Aichi Prefecture, home to the Gojo River Cherry Blossoms and one of "Japan's Top 100 Cherry Blossom Spots." We have superimposed the blossoms swirling on the Gojo River onto our "TEBINERI" glass, a line we have produced at our Iwakura Plant for 20 years. Each blossom is carefully drawn onto the glassware.

## TSUYOIKO Glass nico

It is our hope that little hands and lips will come in contact with real glass during daily life, and help develop rich minds. We have incorporated these hopes into the small "TsuyoiKo Glass Nico" (Strong Children's Glass Nico) with a smiley face. The reinforced opening makes the mouth more resistant to cracking and chipping than regular glass, and enhances safety. The face print is a playful addition to the glassware, and is perfect for children's snack time.

Cute animal pattern is transferred to the glass. Enjoying a meal time while seeking the animals hiding in the glass! The reinforced opening makes the mouth more resistant to cracking and chipping than regular glass, and enhances safety.

Get the idea from fathers and mothers' opinion -Glassware enjoying like reading book- The feature is different designs are printed on the inside and outside of glass, taking the advantage of transparent of glass. Children only see a part of silhouette of animals when the glass filled with juice. Once they drink up juice, the animals are shown up. We hope children enjoy meals like reading books. This series is created by fathers and mothers' opinion and idea.

*Tsugaru Vidro*  
*Product Catalogue*  
2023

**Expressing the four seasons with glass using more than 100 colors.  
Exploring the craftsmanship of Aomori's traditional craft “Tsugaru Vidro.”**

Hokuyo Glass, the maker of Tsugaru Vidro, is a hand-crafted glass studio established in Aomori in 1949.

The factory is filled with furnaces of all sizes, including a large and impressive kiln at the center that burns 24 hours a day, seven days a week, all year round. When the company started, its main product was glass fishing floats used in the fishing industry. The high quality of these fishing floats, made by a technique known as “chu-buki,” in which the glass is blown without using a mold, was responsible for more than half of the Japanese market share.

Over time, however, the glass fishing floats were replaced with plastic floats. In response, the Tsugaru Vidro artisans began to work with “colored glass” to make crafts such as flower vases and large plates.

As the artisans began to work with “colors,” a unique perspective of the world was formed through a fusion of the chu-buki technique and versatile colors, building the foundation of Tsugaru Vidro, which has continued to the present day.

Tsugaru Vidro was selected as the “First” of Aomori Prefecture's many traditional crafts.

One of the features of Vidro is the “colors with a sense of seasonality” created by combining more than 100 colors to create memorable moments.

The technique that supports the foundation of “color,” a significant feature of Vidro, is called “melting,” in which the raw glass materials are blended and melted in a crucible to make the glass base.

The proportions of the blended materials determine the color of the glass.

The slightest difference in material composition changes the color of the glass and the ease of forming.

At Hokuyo Glass, the “Aomori Meisters,” recognized by Aomori Prefecture for their high level of skills, develop and manage the colors based on their many years of experience.

The Meisters are the reason a single studio has become capable of creating countless beautiful colors.

**Just a handful of coincidences changed  
Hokuyo Glass’s color combinations.**

Initially, the artisans worked with colorless transparent glass mainly used for the glass floats. It was a simple coincidence that the colorless glass was colored. Among the many beaches in Aomori, Shichiri-Nagahama has a gorgeous sandy beach and lush nature. One day, an artisan had an epiphany. He added a handful of sand from Shichiri-Nagahama to the materials. The glass changed into an exquisite deep green. The warm hues came to be loved in Aomori and throughout Japan, and the Shichiri-Nagahama handicrafts played a role in revitalizing the town.

## “Shimo” technique of creating Tsugaru Vidro’s unique color patterns

There are two main methods of producing colors. One is to use glass which is colored itself, and the other is to use “shimo.”

Shimo is colored glass that has been crushed into small pieces. The size of the particles varies from large grains to fine, sand-like grains. Artisans can create depth in their expressions by changing the size of the shimo and mixing colors according to the desired effect.

Shimo can be used to create a variety of patterns.

Simply apply to look like icicles, make polka-dotted patterns, spin into a swirl, or layer with other colors for a stained glass effect.

Artisans use their expertise and techniques to create deep colors in the glass according to each design.

## Consistent artisan work from the traditional “chu-buki” techniques and new molding technology to product inspections

At Hokuyo Glass, which began with chu-buki glass, new techniques are constantly introduced. Artisans are divided into teams according to the technique.

For example, spin molding and mold blowing techniques, which use molds, are the core of tableware. Although the products are made by hand, molds are used in the process, a technique that has allowed us to increase production volume successfully. Using molds does not make the process easier. Artisans in charge of each step must coordinate their skills, ensuring that the molten glass is poured into the mold at just the right time, adjusting the amount of glass poured in, and adjusting the intensity of the molds.

In addition to molding, melting, polishing, and inspecting are each important aspects of the artisan's work.

Tsugaru Vidro, dedicated to beautiful standards even for hand-crafted work, will continue producing glass products fitting for someone's memories.

## **Tsugaru Vidro concept**

---

What are the colors of Japan?

Colors like cherry blossoms in the spring, festivals in the summer, leaves in the autumn, and snow scenes in the winter.

We wish to incorporate Japan's rich seasonal colors in our glass.

The thousands of colors in our glass were created from these sentiments.

Tsugaru Vidro starts with red-hot material in the crucible that reaches a scorching 1500°C.

The Tsugaru artisans use their expert skills and techniques to form the glass wound around the blowing pole into gentle, handmade shapes.

Tsugaru Vidro focuses on Japan's unique seasonal colors and combines various colors to show infinite expressions, just like a shifting panorama.

We hope that the colorful and attractive Tsugaru Vidro will be a delightful addition to your meals and relaxation time.

Sake Cup with Masu / KARIN

The appearance combines a cuteness like blossoming flowers with the vividness of glass. Enjoy a crisp, elegant glass of chilled sake with this vessel. The slim shape also suits sparkling sake that is popular among women.

SEA of AOMORI

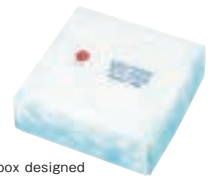

In support of the "CHANGE FOR THE BLUE in Aomori Prefecture" project promoting activities to protect Aomori's seas, we have created a set of sake cups capturing the colors of the four seas surrounding Aomori. We will continue our efforts to change the future of our seas through these sake cups that reflect our hopes to make "the Aomori seas of the future even more beautiful."

**NEW**

**Sake Glass Set Sea of AOMORI  
FS-75508**

Sake glass Taiheiyo (Pacific ocean)×1、  
Sake Glass Nihonkai (Japan Sea)×1、  
Sake Glass Tsugarukaikyo (Tsugaru Channel)×1、  
Sake glass Mutsuwan (Mutsu Bay)×1  
Sake glass Taiheiyo (Pacific ocean):M74 T74 H47 ml85  
Sake Glass Nihonkai (Japan Sea):M65 T65 H51 ml75  
Sake Glass Tsugarukaikyo (Tsugaru Channel):M74 T74 H44 ml50  
Sake glass Mutsuwan (Mutsu Bay):M65 T65 H38 ml50  
BOX SIZE:W165×D162×H55  
12sets

Glittering gold leaf expresses the shimmering seas.

Packaged in a gift box designed after our beautiful seas.

Aomori Prefecture, the northernmost prefecture in Honshu, is surrounded by the Pacific Ocean to the east, the Sea of Japan to the west, and the Tsugaru Straits to the north. It has a wealth of spectacular marine scenery, including Mutsu Bay, an inland bay where wild dolphins gather, and cliffs created by the terrain.

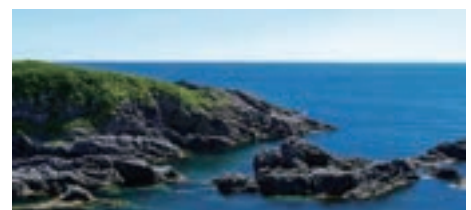

Additionally, the confluence of the Tsugaru Warm Current, the Oyashio Current, and the Kuroshio Current provides Aomori with abundant fish, including tuna and flatfish. The "Umi-to-Nippon Project in Aomori Prefecture" aims to convey the importance and appeal of Aomori Prefecture's seas and create a movement to coexist in harmony with the seas.

The CHANGE FOR THE BLUE project was started in November 2018 as part of the Nippon Foundation's "Umi-to-Nippon Project" (The Ocean and Japan Project). The project aims to raise nationwide awareness of the problem of ocean debris and make each individual resolve "not to allow any more plastic waste to enter the ocean." The mission is to create a model for reducing marine litter in collaboration with stakeholders from industries, government, academia and private sectors that other regions across the globe can adopt.

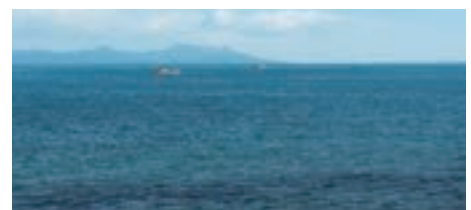

**Sake cup**  
Pacific Ocean: The color of the sky reflected on the majestic Pacific Ocean is expressed with a combination of two shades of sky blue.

**Sake cup**  
The Sea of Japan: The waves and wind interwoven with nature are expressed in bright cobalt blue.

**Sake cup**  
Tsugaru Straits: The greenish-hue of the fast-moving straits is expressed in turquoise blue.

**Sake cup**  
Mutsu Bay: In Mutsu Bay, surrounded by mountains and the sea, nutrient-rich water flows into the bay, expressed in indigo blue.

A portion of the "Seas of Aomori Sake Cup Set" proceeds will be donated to organizations working to protect our clean oceans and their activities.

Aomori glass artisans use colored glass blended to match each fish to create sake glasses that appear to be alive.

FISH of AOMORI

SAKE GLASS TAI

Sea bream is a red, beautiful, high-quality fish. The vivid blue spots on the body side are also faithfully reproduced.

Sake Glass Madai (Red Snapper)  
F-62043

# Gift set

Putting various thoughts  
into warm and rich colors.

Set of handcrafted glasses finished with traditional techniques.  
The gold leaf applied on the blue-green glass appears like moonlight reflecting on the water surface.

Hana Utsushi (Capturing Flowers)

Flowers in nature show colorful expressions in water, such as rain or rivers. The charm of the fresh flowers is reflected in the sake glass. The grains of colored glass resemble flower petals, which flutter and create a relaxing moment with sake.

Hand Made

Enishi Koma

Pair of wobbly sake cups shaped like spinning tops, a symbol of good luck. The soft feel of the frosted glass finish and the sparkle of the gold leaf on the inner surface fuse to create a relaxing moment for enjoying sake.

#### Nanten and Fukujusou

This combination of plants is said to "turn a misfortune into a blessing" and is often seen in container gardens and auspicious paintings.

#### Rabbit and Wave

The image of a rabbit hopping over the sea is often seen on kimonos and sometsuke ware as an auspicious design symbolizing a leap forward.

One of Japan's representative colors is the color of the cherry blossoms that bloom to celebrate the coming of spring. The heartwarming colors of this paired set are inspired by "cherry blossoms and rape blossoms competing in the gentle spring sunlight" and "cherry blossoms viewed under a blue sky."

KYOYA somemonoten Inc.  
Ichinoseki, Iwate

KYOYA somemonoten Inc. (KYOYA the dyehouse) is a dyehouse with a history of 100 years, located in Ichinoseki-City, a castle town in the south of Iwate Prefecture. With a passion to "create impressive items," KYOYA somemonoten continues to explore and work on a wide variety of techniques and dyes ranging from traditional ones to the latest inventions and trends. KYOYA somemonoten, capable of everything from design to dyeing and sewing, offers custom-made products such as festival han ten coats, yukata, and tenugui hand towels. The artisans aim to be a dyehouse that can contribute to Japanese culture's inheritance and the creation of new possibilities through dyeing.

# Interior

Decorate your space with  
the colors of the seasons

Decorate your daily life with  
arrangements of seasonal flowers.

Weaving the seasons  
*Flowers  
and Vases*

TENKAI

Adorn your table centerpiece or reception area with a dynamic flower arrangement.

These wide-mouthed vases are suitable for lush foliage and voluminous flower arrangements. If the flowers are small, add in some more flowers. Place some flowers at the mouth of the vase to achieve a better balance. Arrange the flowers so that the arrangement looks gorgeous from all angles.

Create gorgeous arrangements in small spaces with vases fitting for flowers that can be bent to create movement.

The key to a gorgeous flower arrangement is to choose thin branches that utilize the narrow vase mouth and flowers that can be bent to create movement. Arrange your flowers with a flow that matches the space. Shapes that extend vertically are easy to create and are recommended when you want to decorate a small space with an impressive arrangement.

OWL

Owls are one of the most popular birds in the world. In Japan, owls are called "fukuro," which can mean "good luck will come" or "have no hardship," and are considered to bring good luck.

The red color comes to the lower part of the back.

The red color covers the entire lower part of the body.

The process of making owl.

OWL (Parent & Child)

Owls are one of the most popular birds in the world. In Japan, owls are called "fukuro," which can mean "good luck will come" or "have no hardship," and are considered to bring good luck. The owl also symbolizes good fortune because of its ability to turn its head far and good prospects because of its extraordinary night vision.

## The artisans' passion for creating ideal glass.

### Hokuyo Glass's first female "Aomori traditional craftsperson" certified by Aomori Prefecture. Following senior artisans with beautiful and accurate skills to realize her dreams.

Cute single-flower vases and chopstick rests that fit in the palm of your hand are popular items in the Tsugaru Vidro series, which features various colors and designs.

Smaller pieces are entirely handmade by a single artisan, from taking the glass from the crucible to winding it into a finished product.

Single-flower vases, produced with the pin-blow technique, are often made by female artisans. Delicate and beautiful seasons are expressed with a feminine touch in these small pieces of art.

Misa Tateyama, the first female "Aomori traditional craftsperson" certified by Aomori Prefecture at Hokuyo Glass, is one of the artisans in charge of the pin blow technique.

With more than 25 years of experience as an artisan, Tateyama is also in charge of making chopstick rests and ornaments in addition to pin blow items. Pin blow is often used to make round items. Creating a perfectly round item is challenging, as a single error in breath can cause the shaft to waver. If the shaft wavers when making a single-flower vase, the mouth for inserting the flower may become slanted.

Sophisticated skills are required to blow the glass to an even thickness and create a centered round shape.

According to other female artisans who joined Hokuyo at the same time as Tateyama, "Misa is a true artisan who can continuously create the same product with precision." As the product's popularity increases, so does the demand for speed. However, the ability to create the same product without compromising quality is a sign of a skilled artisan.

### An admired artist who continues to train young artisans while improving her own skills.

Recently, more young female artisans are entering the trade, and Tateyama has focused on training these young artisans. These young artisans look up to Tateyama, who, even after becoming an Aomori traditional craftsperson, continues to practice daily and refine her skills as a glass artisan.

"Even as an artisan, I find the various colors of Tsugaru Vidro attractive. I can personalize how the colors are used by creating unique color combinations.

The same item, depending on the artisan, can differ ever so slightly in color and shape. To me, this is the fascination of hand-crafting."

We asked Tateyama her motto. She said her theme when making glass is hoping that the item "will be loved."

"It makes me happy when someone finds, out of many glass items, an item they want to use every day and come to enjoy glass more."

Just as each person perceives the seasons differently, they can find one item that matches their tastes while enjoying the subtle differences of the same product. That is the magic of Tsugaru Vidro.

Hokuyo Glass Co.,Ltd.

Misa Tateyama

Unable to forget a glass paperweight containing small flowers that she saw as a young child, Tateyama sought a career in her interests. She was an Aomori traditional craftsperson certified by Aomori Prefecture in 2021. At home, she is the mother of two children.

Supporting production with accurate skills while committed to training young artisans.

# Collection

Fine article crafted by skilled  
artisans using traditional techniques

Spring with dancing cherry blossoms, summer with shining greenery, autumn with burning red mountains, and winter with a silvery-white world.

Tsugaru Goyomi / Tsugaru Calendar

The scenery of Michinoku Tsugaru is filled with an amazing variety of colors. The colors change with the changing seasons, creating a beauty that is a delight to the eyes.

Tsugaru Goyomi, a series of vases produced by the Tsugaru VidroStudio, pays homage to this northern landscape. The scenery of the land, which changes colorfully throughout the year, is expressed in vivid colors and patterns that bring the flowers arrangements to life. We hope you will enjoy the colors of Tsugaru, which are full of life.

## The Tsugaru Vidro Studio

The Tsugaru Vidro Studio uses the traditional technique of chu-buki (free-form glassblowing), which has been handed down from generation to generation, to create works of art with soft forms and beautiful colors that can only be achieved with handiwork. The vases express the richness of the four seasons of Tsugaru with harsh yet beautiful reflections of nature.

Daytime cherry blossoms under the sun shining through the springtime trees;  
 Nighttime cherry blossoms illuminated after the veil of darkness lowers;  
 The gap between this fantastic world and the solemn atmosphere touches the heart.

## HIROSAKI SAKURA HANA AKARI

“Hana Akari”- the Light of Flower - evokes the ethereal brightness of a night sky filled with fully bloomed cherry blossoms. Hana Akari recreates the cherry blossoms' iconic image through the three-dimensional layering of colored glass, including pink, and the addition of gorgeous gold leaves.

## Beautiful heritage masterpieces reflecting the rich scenery of Tsugaru

Tsugaru Vidro, born from the sands of Shichiri-Nagahama on the west coast of the Tsugaru Peninsula, has continued to produce beautiful, flowing glass using the “chu-buki free-form glassblowing” technique that has been handed down since the first century BC.

The four representative series, “Aomori,” “Shichiri-Nagahama,” “Mutsu Bay,” and “Hakkoda Zarame Snow,” were widely popular as masterpieces reflecting the nature of Tsugaru. Production was discontinued for various reasons, but we have been able to revive them with the help of traditional artisans, known as Aomori meisters.

### 七里長浜 Shichiri-Nagahama

“Shichiri-Nagahama” series recreates the color of nature once made by melting sand from Shichiri-Nagahama. This deep and powerful green color, called Tsugaru Green, is nostalgic and comforting.

**ADERIA**

*History*

## 200 years of leading glass industry since 1819

Our pursuit of glass manufacturing began with an order for vidro sculptures received from a feudal lord.

Japan's first melting techniques opened the road to mass production.

Ishizuka Glass originated in 1819 with the glass sculptures Iwasaburo Ishizuka made in the current Dota area of Kani City, Gifu Prefecture. Iwasaburo started with "vidro sculptures" ordered by the lord of the Owari Domain. Ishizuka Glass grew during the Meiji and Taisho eras, and has continued to wholeheartedly pursue glass manufacturing. We were the first in Japan to mass-produce highly transparent glass, which allowed us to make glassware a "familiar part of daily lives" .

ADERIA was born in 1961 when Ishizuka Glass fully entered the tableware industry.

“ADERIA” was born when Ishizuka Glass fully entered the tableware industry developing products with familiar richness to become popular tableware for ordinary families.

“ADERIA”, named after the Adriatic Sea area that was famous for glass manufacturing techniques developed during the Medieval European era, has continued to develop glass tableware according to increasing demand. Popular products that our brand has created for more than 50 years are found in every home. Items include nostalgic glasses, glasses with cut designs, and fruit wine bottles for making plum wine. Each item is unique to “ADERIA”, which aimed to develop products that matched the times. We hope to continue providing products that are “handy and have a familiar richness”.
