GLASS
COLUMN

Mouth finish of tumbler and stemware

Cold Cut (CC)

Cut off the burn-off ring with a diamond cutter, polish it with a file with diamonds to make it smooth, and lick it with flame. Since there is no ring, the mouth part looks sharp and high quality. Applicable products in the catalog are indicated by "CC".

GLASS COLUMN

How "Foaming Glass" works

In order to drink beer more deliciously, it is important to make fine creamy foam. "Foaming Glass" is made by sandblasting and frosting the inner surface of the glass to create fine irregularities. These fine irregularities are the decisive factor for creamy foaming.

How to enjoy a delicious beer with "Foaming Glass"

1. Wash the glass thoroughly with detergent and dry it well without wiping it. Foams do not generate nicely when wet.

2. Pour cold beer slowly and gently along the inside of the glass.

3. The frosted glass-like irregularities on the inner surface create fine bubbles, and you can enjoy a creamy taste.

GLASS COLUMN

Japanese Sake

純米酒 (Junmaishu)

Rich, Slightly Dry

To enjoy the rich flavor, the short curving shape distributes the sake evenly in your mouth.

Appropriate Temperature for "Junmaishu"

Around 15°C. The tip to enjoy sake's mellowness and lingering flavor is to drink it at an appropriate temperature.

吟醸酒 (Ginjoshu)

Higher flavor, elegant and refreshing taste

The open top glass shape makes it easier for sake to come into contact with the air, further emphasizing the aroma and refreshing feeling.

Appropriate Temperature for "Ginjoshu"

10°C-12°C. Be careful not to let the temperature get too high. The scent will disappear. Also be careful not to lower the temperature too cold.

生酒 (Namazake)

Fresh scent, smooth in the throat

The slim, open-top glass shape allows sake to flow straight into your mouth, making it easier to pass down your throat.

Appropriate Temperature for "Namazake"

6°C-10°C. The tip is to drink it cold.

古酒 (Koshu)

Calming scent, mellow taste

In order to enjoy the deep scent and taste, the vertical seed-like glass shape is ideal to retain the scent.

Appropriate Temperature for "Koshu"

15°C-20°C. This temperature range maintains the balance between sweetness and sourness.

The word “Yachiyo”, literally means “eight thousand generations”, symbolizes eternity and is considered to be a poetic and divine praise. Ancient Japanese motifs are actively fused with modern elements in each “Yachiyo Kiriko” design, which makes “Yachiyo Kiriko” unique to traditional Japanese cut glass schools and earns high artistic praise.
